Questions

1) SELECT statements

//Select *

from employees

2) SELECT DISTINCT statement.

//Select distinct departments.

from employees.

3) Order by statement

// Select first_names, last name, salary

from employees

order by salurary desc

4) Limit statement.

```
// Select first_name, last_name, salary As Highest_paid
  from employees.
  Order by salary desc
   limit 5.
```

5) Where statement

```
//Select first_name, last_name, department
  from employees
  where department = "IT"
```

6) And statement

```
// Select first_name, last_name, department, salary.
  from employees
  where department = "finance" and salary > 58,000
```

7) OR statement

```
//Select first_name, last_name, department
  from employees.
  where department = "~~finance~~ HR" or department = "Marketing"
```

8) Not statement.

```
// Select first_name, last_name, department
  from employees
  where department not in ~~("IT")~~ ("IT")
```

9) IN statement

```
//Select first_name, last_name, department.
  from employees
  where department in ("HR", "IT", "finance")
```

10) combining conditions

//Select first_name, last_name, city, salary, department.
from employees.
where department = "IT and salary > 50000
and ~~local~~ city = New york

11) Combining where, and, order by.

//Select first_name, last name, department, salary
from employees
where department = "finance" or department = "Marketing
and salary > 52 000
order by salary desc

12) ~~Cob~~ Combining where, not, And, and order by

Select distinct ~~cities~~ City, department.
from employees.
where derpartment not in ("IT", "HR")
